

Do you prefer ice cream with flavours other than vanilla?

Kontali is a company within the seafood industry with the most complete privately owned seafood database in the world. We are seafood experts building a state-of-the-art analysis platform and customer interface for the seafood industry. Our brand name is well known within the industry globally. Not like rock stars, but as highly reputable analysts and consultants. With Arendals Fossekompagni coming in as new owners of Kontali, we are expanding our competence including data engineers, data scientists, developers and digital sales and marketing in our organisation. We have already taken major steps with our latest recruitments and are looking for candidates that excited to make a choice out of the ordinary.

As a data engineer, your main responsibilities will be:

- Process datasets to predict seafood supply, demand and pricing globally.
- Develop models appropriate for the problem at hand using machine learning, statistical methods, optimisation methods and other techniques where this applies.
- Identify ways to improve data reliability, efficiency and quality in our data.
- Use large data sets to address business issues.
- Deploy sophisticated analytics programs, machine learning and statistical methods.
- Prepare data for predictive and prescriptive modelling.
- Automate model processing and manual procedures continuously.
- Find hidden patterns using data.

Profile:

- Higher education within a relevant field of study (master's degree or doctor's degree). Relevant experience may compensate for missing formal degree.
- Able to contribute and cooperate with a multidiscipline and multinational team.
- A significant set of technical and modelling skills, the broader the better. As we are in the process of defining our technical platform, you may contributing in making the right choices
- Eager to continuously expand your expertise.

What we offer:

- Flexible work policy
- Competitive salary and benefits package
- Opportunity to become a Kontali shareholder
- A dynamic and international working environment
- The opportunity to make a difference in a world leading company with a unique position.

A highly experienced CTO has already signed for Kontali. Would you like to join his team?

Workplace is at our headquarters in Kristiansund with remote work as an alternative

Kontali Analyse AS is a world leading and independent company analysing the market of fisheries and aquaculture on a global basis. The company currently has the world's most comprehensive private information database, a base that has been built up over more than 25 years. In addition to research and analysis for both private and public players, we also publish a number of publications and reports. We are currently 15 employees at our headquarters in Kristiansund, Norway, and two employees at our offices in Haag, the Netherlands. We expect to be 28 employees by year end 2021.
